The game is called Batter Mount (MOD Unlimited Money) and the product of developer ViperGames. Table of Table of C2 [Show] has always held a stable position in the genre of stickman games, no matter what period of time. Thanks to its ease of play, simple but eye-eye-eye-attracting, the maker can create a variety of gameplay for this unnamed, faceless character. Shadow Fight 2 or Mr. Bow is an excellent game for all of this genre. And believe me, batter mounts are as hot as the two games above. Launched from the end of 2018, when it reached 10 million downloads with Google and many winged comments, you have a good understanding of how this game is. Gameplay I say unmount the batter is not natural and can dispel all inhibitions and your anger, it is well based. The gameplay of this game is unimaginable! Your job is just to torture the young stick until it is crushed. Honestly, I'm not kidding. You still control the stick man, but he's plunged into fatal accidents with horrific conquests of giant slash blades, bombs, bullets, etc. With each collision like this, the character is a little bone-breaking, and the more fractures, the more points he receives. You control them to get into the slaughtered accessories placed in the game so that you can damage the brutal characters. It helps your character fly into a lucrative position and allows the saw blade to tear in the most thorough way. Also, in addition to torture, there are catastrophic traffic accidents, and in addition to adding satisfaction to the game, various means can be used. It's barbaric, but you don't have to take responsibility for poor batters with stickman unmounting. He's immortal, he'll be back soon! In the early levels of play, you don't really have eyes, you just get used to the game. But the rest will be a completely different killing sky. At this point, the hegemony of the new weapons is shown. Your character will be immersed in the rain of bombs and bullets, fractures left all over your body, and mostAlways be alone. The game really stops only when your character falls to the ground without taking damage for 3 seconds. Batter mounts have a total of 15 levels, which means that the stickman guy is killed at least 15 times in the game. However, to reach a higher level, you need to reach enough points required for the lower level. It can also cause catastrophic accidents in the game thanks to the vehicles available. Cars, 300 cubic meters of motorcycles and cannons are also a bad choice to create a beautiful death. FAQ I haven't seen the money using the batter mount mod? When you complete the first level, you will see the money. Have fun! GraphicsStickman Unmount is based on two mainly black and white colors and some other basic colors. The game doesn't really invest in graphics, but instead it's very cool and crazy gameplay. I know many of you are afraid to watch gore scenes, kill, but don't worry because stickman mount images are not too violent, it's simulated in stickman characters because it's not too scary. Given it's simply a heavy entertainment game, it helps you relieve pressure effectively. Finally, if you're on a bus and you happen to see a guy laughing looking at his phone, maybe he's watching a comedy video, maybe he's chatting with his girlfriend or maybe he's playing a Stickman mount. A game that looks violent but brings laughter by humorous stunts. This is a really bad idea for those who are looking for an interesting game but haven't found it yet.
